STALIN BUSY PREPARING MEW WAR!? FOR

Sensational Article By Former Head Of Soviet Metallurgical Trusts, Plants

"Straining Every Nerve³³

London, Oct. 13. Generalissimo Stalin is accused of "straining every nerve" to get ready for a new war in a sensational article by Victor Kravchenko, a man who broke away from the Communist Party while in the United States two years ago, in the "News of the World," the London Sunday newspaper which this week is expected to approach the 8,000,000 circulation mark.

Kravchenko, former chief engineer and director of metallurgical plants and trusts in Soviet Russia, went to the United States as a member of the Soviet purchasing commission and recently wrote the best seller book "I Choose Freedom," denouncing the Stalin regime.

U.S. AND CHINA

What was expected all along

has now occurred; M. Gromyko, Soviet delegate to the United Nations Security Council charged that the presence United States marines in China creates a state of affairs which might lead to international friction. The intermittent campaign in the Soviet press against the presence of American forces in China indicated that this would happen sooner or later, and after Russia failed in a similar attack against Britain and the Greek Government, it was natural to expect that China and the United States would next be singled out for attention. The fact of the matter is that the American force are in China at the request of, and with the consent of the Government of that country,-incidentally the only government of China which the Soviet overtly recognizes. It would be time enough for M. Gromyko to take the step he has if the Chinese Government has asked for the withdrawal of the forces now in their country, and the United States had failed to meet that request. That not being the case it is difficult to see exactly what ground the Soviet Government has to stand on. The allegation that the exist-

ing state of affairs between th Chinese Government and presence of U.S. forces might lead to international friction is interesting and perhaps significant. With whom can there possibly be friction? Between China and the United States? Obviously not. Then between whom is there likely to be this friction; between the United States and Soviet Russia? "Not unless it is the desire of the Soviet, uninvited by China, to take an increasing interest in Chinese - affairs. There most certainly can be no friction be criminals should be released done away with, anyhow tween Britain and the United "with the brand of Cain on For another half-guinea, States in this matter, nor has there as yet been any suggestion that France is interested one way or "the other..." It is, therefore, not true that there is any danger of international friction with regard to China unless Soviet Russia herself desires to create it, and the conclusion to be drawn is that the complaint is ill-founded in fact.

One aspect of this interpretation of the United Nations Charter is that, if it is allowed to prevail, no Government is master in its own country, no Government shall be allowed to decide what type of assistance from another nation it requires. Greece apparently still decides that the mission on which British troops were invited into Greece has not yet been concluded. That is a matter on which Greek judgment must be supreme. The same applies to China, where, and again it must be emphasized —it is the Iruling of the only Chinese Government which Kremlin recognizes that the mission on which American forces were asked to come to China has found in ships for partels, " not yet been completed. There is one other thought which arises in this connection. With the iron veil in eastern Europe hiding so effectively what it is suspected me that there is something is going on, how far are these all peculiar about the timing of round attacks by the Soviet to be Field-Marshal Lord Montgoregarded as a squidlike effusion to mery's despatch on the Euro- pay. distract the attention of the world pean campaign published in from the manner in which the London Gazette. "Izvestia" Brings Up Race Issue

"Izvestia" today published an article entitled "racial discrimination in the United States" by the Soviet writer Vronsky.

"There are many publicists and political leaders in the British Empire and in the United States who talk about the principles of the Atlantic Charter. especially when it concerns other countries," Vronsky states.

"Thus, the Australian delegate to the Peace Conference proposed the creation of a European interational court of the rights of man. Trouble Growing For Years

New York, Oct. 13.

Trouble for the Carmona-Salazar Government in Portugal has been growing for several years. The regime had seemed to be almost suspended in midair without majority support of any of the country's major factions, except possibly the Army.

The most powerful section of the army officer group which originally installed Carmona as president in 1926 has been reported disaffected for some time. Dictatorship has been caught between the Republican forces, which refer to it as Fascist, and the Monarchists, whom the Government has sought for years to hold in reserve for the time when it might be forced to fall-back upon them.

RUSSIANS TALK OF FOOTBALL NOT WAR

(By Eddie Gilmore)

Moseow, Oct. 13. Returning to Russia after five months' absence, one is immediately struck by startling differences in what the people are talking about abroad and here.

In the United States, it was a Third World War, fear of it and a definite pessimism about the prospects of peace. In Britain, it was war and fear of war to a somewhat lesser extent. In Sweden and Finland, war-talk was still prominent in conversations, but, in Russia, there it little or no talk of war — certainly no expressed fears of it.

Cup-Tie Fever The Soviet Union's soccerfootball teams are in the midst of the annual play for the football cup of the USSR. Never has there been such interest in football as there is today. There is no anti-British or anti-American feelings, such, here.

There are articles of criticism in the Russian press and radio about the United States and Britain, but I would be untruthful if I did not say there is three to five times as much anti-Russian sentiment in the American and British press and radio as here against those two countries.

Stock Market Takes Another Spill Silver

(By Victor Eubank)

New York, Oct. 13. The stock market suffered another spill during the past week, hitting a new low since early last year, but recovered almost all its losses in the final two sessions.

In the early part of the week brokers found customers generally depressed and inclined to liquidate because of skepticism over production due to strikes, price difficulties and widespread material shortages.

WEEK-END

New York, Oct. 12. This is a weekend of dread for American housewives. Prices have gone crazy. The extra-ordinary scarcities of practically everything needed for the kitchen, coupled with the general lifting of price controls, has sent domestic budgets up ten to sifteen per cent in a single week.

ARMS DUMP IN TIBERIAS

Jerusalem, Oct. 13. During a four-hour (search of Tiberias, on the shores of Lake Galilee, the police, with mine-detectors, discovered a wooden hut in which large. quantities of weapons were found, it was officially announced here todan.

Among the finds were 171 cut-down American type beercans. containing detonators, nearly 400 hand-prenades and quantities of assorted rounds of ammunition, the statement added .-- Reuter.

Annoying But Not Dangerous

Washington, Oct. 12. "Annoying but not dangerous," it was aneged of Russian propaganda and organisational work in Japan by a member of the House of Representatives, who added that if United States troops were withdrawn from China "Russia is ready to step in and establish puppet governments."

Democratic Congressman Robert L. F. Sikes, one of the committee just back from a tour of the Pacific areas, declared in a broadcast: . The Russian mission in Tokyo has many times more people in it than any of the others. It has more money to spend.

"The diplomatic work to be done out there does not require | that 40 to 50 every-day coma staff of this size. It seems that modities have disappeared. The there-are only two other channels | old phrase of "scarcity in the -propaganda and organisational midst of plenty" has become

"But the men who know out there say that these activities are annoying but not dangerous. "If we leave the Far East now, it will be because we were bluffed out. By all official reckoning, there is more food available, per head of the American population today than ever before in the nation's history. And yet inexplicable shortages harry the housewives. The question of what happens between the production stage and shop counters baffles the nation.
